

Week 12 Report: Final Submission

Project: Analysing the Role of Big Data Analytics for Cyber Threat Detection and Prevention in Banking Organisations of Ireland

Student: Jayanth Akarapu

Supervisor: Dr. Prasanth Nayak

What I did this week

This is my final submission. It contains the final report (thesis.pdf), the full code, and the results files behind every table and figure. The whole experiment can be repeated with one command, `python src/pipeline.py`, after downloading the dataset from Kaggle.

Before submitting I checked every number in the report against the results files, confirmed that all references exist, and removed the old draft files.

File	Content
thesis.pdf	Final report
src/pipeline.py	Full experiment
notebooks/analysis.ipynb	Executed notebook
results/	CSV and JSON results
figures/	All report figures
README.md	How to reproduce
