

Week 10 Report: Report Writing

Project: Analysing the Role of Big Data Analytics for Cyber Threat Detection and Prevention in Banking Organisations of Ireland

Student: Jayanth Akarapu

Supervisor: Dr. Prasanth Nayak

What I did this week

This week I started the final report. I wrote the introduction, the related work section and the methodology. The related work now uses the checked papers from my literature review, and I corrected some citation details, such as the year of Ofoegbu et al. and what Ali et al. (2022) actually found.

In the methodology I describe the dataset, the preprocessing steps, the single fixed train and test split, the tuning procedure and the statistical tests, so that someone else could repeat the study.

Section	Status
Introduction	Drafted
Related work	Drafted with checked sources
Methodology	Drafted
Design and implementation	Next week
Evaluation and discussion	Next week

Next week

Write the design, implementation, evaluation and discussion sections.
